(Basic Policy on Cross-Shareholdings)

- The Alfresa Group's policy on cross-shareholdings is to hold only shares that further important objectives in our group's strategy, such as maintaining and furthering good trade and collaborative relationships or creating new business opportunities in order to realize a healthcare consortium, and to reduce shareholdings that do not further these objectives.
- Each year, we confirm the original purpose of our holdings, quantitatively verify that the benefits and risks associated with our holdings are commensurate with capital costs, and qualitatively verify the significance of our holdings over the mid- to long term. These results are reported to the Board of Directors.

Supplementary Explanation

In the fiscal year ended March 31, 2020 (from April 1, 2019 to March 31, 2020), 343 million yen in total was paid by the Company to 12 officers. This amount includes officers' bonuses of 57 million yen for the year ended March 31, 2020 and transfer to bonus reserve for stock price-linked compensation of 19 million yen. Stock price-linked compensation is being used as an alternative system until the performance-linked stock compensation system (BIP trust for officer compensation) is introduced; it pays a monetary amount instead of stock calculated based on the same method as the performance-linked stock compensation system. Conditions continue to prevent the Company from establishing a BIP trust for officer compensation, but after these conditions are eliminated, the Company plans to promptly introduce performance-linked stock compensation. The amount of remuneration for each officer by type has been omitted as there are no officers receiving total consolidated remuneration of 100 million yen or more.

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

1. Matters pertaining to the policy concerning the determination of the amount of remuneration, etc. for officers or the method of calculating such amount

Our officers' remuneration is based on the standard amount for each rank of officer. In setting this standard amount, we use remuneration data from external specialist organizations as well as publicly-available information to assess the remuneration level of companies in both the same and other industries. The remuneration composition differs between executive directors, non-executive directors (including outside directors), and Audit & Supervisory Board members. In addition to basic (fixed) remuneration, executive directors are compensated with bonuses linked to relative achievement of performance targets for each fiscal year and performance-linked stock compensation (stock price-linked compensation currently being used as a substitute), a system aimed at increasing the motivation of directors and other officers and enhancing long-term corporate value in order to achieve the mid-to long-term performance objectives set forth in the 19-21 Mid-term Management Plan *The Challenge of Further Growth "Together with Health, Together with Communities."*

Executive Directors

Fixed remuneration (basic remuneration) 70% + performance-linked remuneration (bonuses) 20% + performance-linked remuneration (stock price-linked compensation) 10%

Non-Executive Directors and Audit & Supervisory Board Members

100% fixed (basic) remuneration

(Note) Figures for bonuses and stock compensation, which are performance-linked, represent the percentage of remuneration under standard performance achievement.

2. Method of calculating performance-linked remuneration

(1) Method of calculating bonuses

The amount of bonuses paid was determined individually by multiplying the base amount by the bonus composition ratio (20%) within a range from 0% to 200%, in accordance with the degree of achievement against initial targets for consolidated operating profit margin and profit margin attributable to owners of the parent for each fiscal year in order to ensure our values are aligned with those of shareholders and to further motivate officers to contribute to corporate performance. The Company has reviewed the plan to individually determine the amount to be paid by multiplying the base amount by the bonus composition ratio (20%) .

Targets and achievements of bonus indicators for the fiscal year under review are as follows.

1) Operating profit margin

Target: 1.69%

Actual: 1.77%

2) Profit margin attributable to owners of the parent

Target: 1.40%

Actual: 1.49%

(2) Method of calculating stock compensation (stock price-linked compensation)

Method of calculating stock compensation

Stock compensation serves as an incentive to increase corporate value over the long term. The number of our shares to be issued is determined by annually granting and accumulating the base points calculated according to the amount obtained by multiplying the base amount by the stock compensation composition ratio (10%), and after the conclusion of the medium-term management plan, varying the cumulative value of the base points within the range of 0% to 200% according to the achievement level of the business performance targets in the medium-term management plan. As with bonuses, the performance indicators utilized include the consolidated operating income margin and the profit margin attributable to owners of the parent, which have been positioned as key performance indicators in the medium-term management plan. In doing so, we aim to ensure our values are aligned with those of shareholders and to further motivate officers to contribute to corporate performance.

Method of calculating stock price-linked compensation

Stock price-linked compensation serves as an alternative system until the performance-linked stock compensation system is introduced. Using base points in the same way as stock compensation, they are annually granted and accumulated during the period of the medium-term management plan, and after the conclusion of the plan, the cumulative value of the base points is varied within the range of 0% to 200% according to the achievement level of the business performance targets in the medium-term management plan, and then multiplied by the stock price on the baseline date as stipulated in internal rules to determine the amount paid. As with stock compensation, the performance indicators utilized include the consolidated operating income margin and the profit margin attributable to owners of the parent, which have been positioned as key performance indicators in the medium-term management plan.
